

CFDs on margin carry a high level of risk and may not be suitable for all investors. Before deciding to trade foreign exchange and derivative products, you should carefully consider your objectives, financial situation, and level of experience and risk appetite. The possibility exists that you could sustain a loss of some or all of your deposited funds and therefore you should not speculate with capital that you cannot afford to lose. Please see the risk warning page below under the legal section.

As CFDs are margined products, the traded value is financed through an overnight credit/debit charge. If a position is open and closed during the same trading day, you are not subject to overnight financing.
